Furthermore, it is ideal for a larger family or multiple generations who wish to live together.

The three-story house (basement, ground floor, and upper floor) is accessible via three entrances.

One of the entrances leads into the house, the other two into the former shop. The building has four bedrooms, two on the upper floor and two on the ground floor. The rooms on the upper floor share a balcony.

The basement, currently used as a cellar, contains a storage room and a boiler room with a combination boiler.

On the ground floor, there is a spacious room, an adjoining bathroom, and a separate toilet.

... On the ground floor, there is a spacious, open-plan kitchen and a living room with a wood-burning stove.

Also on the ground floor is a storage room accessible from the living room.

This has been converted into a generously sized room that can also be used as a garage.

Adjacent to this are a toilet and a storage room that could easily be converted into a bathroom. A large terrace is accessible from the house.

On the first floor, there are two bedrooms with a shared, large balcony.

There is also a separate bathroom with a toilet and an adjoining storage room on the first floor.

This floor also features a kitchen with a dining area and a spacious living room with a balcony.

There are several parking spaces in the courtyard and in front of the house. The house is connected to the internet and television.

The house was built in 1989 and underwent extensive renovations in 2022.

The renovations included the installation of a completely new sewage system as well as new water and electricity lines. In addition, the entire interior of the house was insulated with plasterboard, and the attic was further insulated with polystyrene.

Hot water and heating are provided by a new gas condensing boiler, for which 17 new radiators were installed throughout the house.

The house is built of brick, with a 40 cm thick concrete joist ceiling and a roof covered with Bramac tiles. The exterior windows and doors are made of wood.

Inside, wooden doors were installed, and the floors are covered with ceramic tiles and laminate parquet. The bathrooms and kitchen are tiled. The electrical connection is 230 V.
